

Clark Handling

WORKSPACE & HANDLING SOLUTIONS NEWS

John Clark, Managing Director

After 14 years specialising in design and supply of Material Handling and Storage equipment, as well as turnkey office and racking installations, Clark Handling moved to their current address near Durham last year.

Clark Handling recently completed the re-building of a three storey office block for Siemens Energy Service at Newcastle. As well as this work, a special mezzanine work station was installed, and an extensive installation of steel partitioning and suspended ceilings to create separate working areas within the plant areas.

Clark Handling designed and supplied specialised equipment to help Siemens move and transport heavy items, including equipment fitted to their Clean Rooms.

Siemens have as a result awarded Clark Handling as a Siemens Approved Supplier.

Recently Clark Handling have achieved accreditation as Safe Contractor to enable the company to work on sites who only work with companies who work to strict Health and Safety Guidelines, and who also work within the Safe Contractor programme.

Clark Handling recently installed a mezzanine floor complete with an insulated office with ceiling for Hardy and Greys at Alnwick. Hardys have been using Clark Handling for over 12 years, with requirements for a Mezzanine and Racking for their Alnwick and Cramlington warehouses.

Clark Handling work on an annual basis carrying out safety inspections for Pallet racking and shelving, this work carried out for local customers such as Komatsu, and the Phileas Fogg. Co, as well as many other Nationwide based customers. To help with the current climate the company offers re-usable equipment to help with these costs.

Clark Handling have recently carried out a dismantle and re-build of internal Control Room for SCA Hygiene at Prudhoe.

Clark Handling are the Northeast and Scotland Agent for Thorworld Industries, who manufacture a vast range of equipment to assist with the loading and un-loading of equipment from trailers and containers. Over the last 6 years Clark Handling have supplied Mobile Yard Ramps and specialised loading equipment, for customers to view in the area if required. Recently Pirelli Tyres at Carlisle had un-loading problem that was cured by use of a special Ramp and Dock-board combination.

RE Media have been appointed by Clark Handling to carry out the re-design of the company web site. This currently shows the main products and service offered, and in June this year will include a web based catalogue showing up to 5000 standard products available.

Customers will be offered a trade discount from the prices shown in order to attract further business.

Managing Director John Clark offers his time as a consultant during times of new factory development, or the need to improve current Material Handling processes.

Clark Handling Ltd. HEAD OFFICE: Unit 13D, Oakway Court, Meadowfield Ind. Est, Durham DH7 8XD. United Kingdom.
