

# Mezzanine Flooring

Add a brand new level to your business

## Stairway to heaven

More than just adding the floor space, we advise you how to ensure that you comply with appropriate building regulations.

## Go Green!

We also reuse mezzanines and can offer you a used platform at a lower price. Good for you, better for the environment!

At Clark Handling, we are a national company that designs, supplies and fits bespoke structural steel mezzanines. By far the most cost effective way to increase your factory's capacity or storage space is to install a mezzanine floor.

If your current premises aren't big enough for your needs & you don't want the headache of relocating or are reluctant to spend the time

& money building a new extension, you need a mezzanine platform. Most commercial premises have unused headroom which can be used as additional space for upstairs offices, meeting or storage rooms, or just simply to maximise your warehouse's capacity.

### Don't move - Improve!

Choose from either single, double or triple deck heights with stairs, handrails and additional features

including lifts, pallet loading gates, partitioning walls, doors & windows – pretty much anything you need.

Further advantages of adding a mezzanine is speed. We can transform your workplace in just a few weeks, with the minimum of disruption to your workplace.

If your business will benefit from adding extra floor space with a mezzanine floor call Clark now on 0845 602 9663.
