

# Partitioning & Ceilings

## Why move when you can improve?

At Clark Handling we design, supply and build custom workspaces throughout the country, which allows you to make better use of your existing premises, instead of having to relocate your site.

The benefits are similar to our mezzanine floors; rooms are erected fast and cost-effectively with minimal disruption to your business. They are modular and available in steel, plasterboard or timber sections and can be easily demounted and reconfigured. Depending on your needs we can even offer double skin steel with sound proofing.

### Complete Turn-key solutions

We project manage the entire process for you, from a small industrial room to a large, modern office or call centre.

At Clark handling, we will also fit suspended ceilings and carry out electrical & plumbing installation. We can also offer carpets and a full decoration service to finish the project to a high standard.

If your business needs to expand and doesn't want the expense of moving, call Clark's design department now on 0845 602 9663 and let us help with this or any other workshop requirements.
