

Pallets & Stillages

Custom designed storage for you.

Clark Handling is a national company that designs and manufactures both standard and bespoke steel pallets & stillages for all sectors of industry.

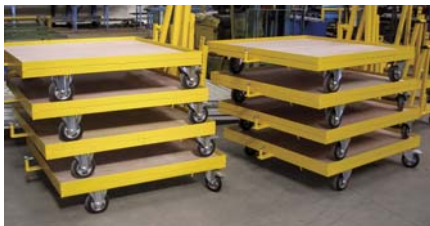

Manufactured using mild steel, stainless steel and aluminium, these units can be static or mobile and inter-stackable to save valuable floor space. We supply to the automotive, food and glass industries and utilities – basically any factory or warehouse.

We also offer a refurbishment service and have the facility to rework old designs into new to help reduce your costs. Our paint shop allows you to choose your finish from a range of standard RAL or BS shades.

We design and fit dunnage protection to help cushion goods in transport as your parts are loaded into your stillages.

Special dollies can be designed to allow pallets and stillages to be pushed or towed with ease. Customers who request their stillages to be load tested can have this carried out and will receive a certificate to guarantee their peace of mind.

If your business could do with a new supplier of steel pallets and stillages, then call Clark now on 0845 602 9663.

Everything you need under one roof – Ours.
