

# Fork Lift Attachments

Your fork lift can do more than just lift.

Clark Handling is a national company that supplies & fits the best and most widely used fork truck attachments.

### Access Platform attachments

One or two man safety access platforms complete with harness rails. Gated models are available where the gate locks operate automatically when the platform is raised.

### Drum Handling attachments

We supply a wide range of drum handling attachments to cope with both plastic and steel containers. Designed to lift, carry, rotate or perform all three functions. Attachments are positive locking to the forks for safety.

### Skip attachments

Self tipping and bottom opening skips are available to help you handle your waste easily and without mess. Available in different sizes and thickness, also optional castors.

We also offer a large range of other fork-lift attachments such as booms, jibs and fork extensions and much, much more.

If your business could benefit from adapting the capabilities of your fork lift trucks with some of our attachments, or have any other handling problems we can help with, call us on 0845 602 9663.

Everything you need under one roof – Ours.
